The Digital Marketplace Network DMN Multi-business Multi-collaborative Platform

Digital Marketplace Network (DMN) for marketplace users (buyers), marketplace participants (suppliers) that provides Business-to-Business (B2B) and Business-to-Consumer (B2C) solutions and mobile-driven applications. A smart Intelligent Automated (IA) to Artificial Intelligent (AI) platform integrating social media marketing (viral network effect) engaging users | buyers, service offerings (value-added products) sellers | marketplace participants, e-commerce (secure payment) contracts | transactions. Providing an online user experience that attracts and retains new generation of millennials.

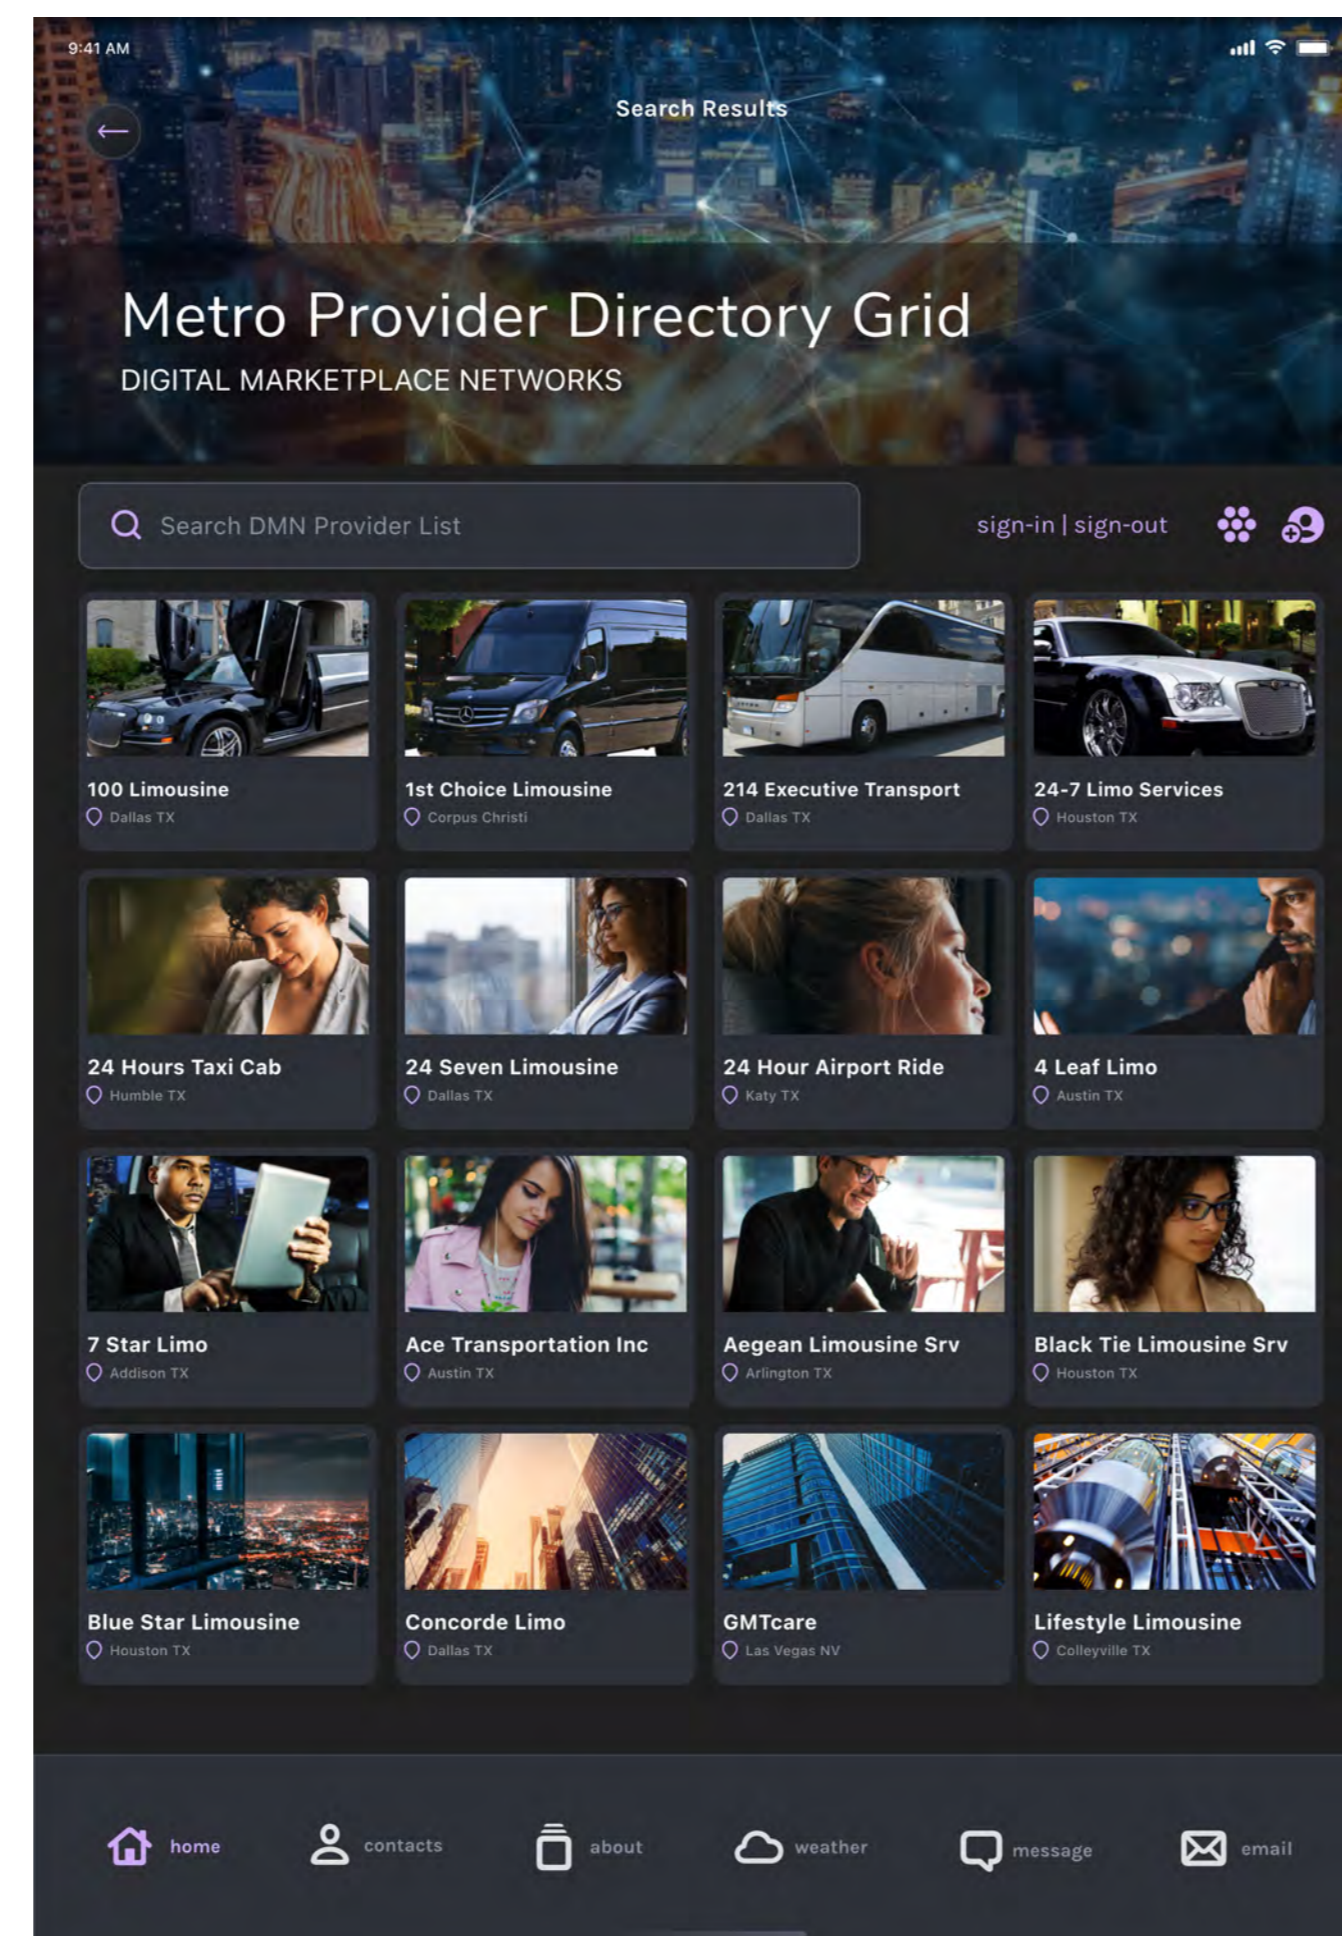

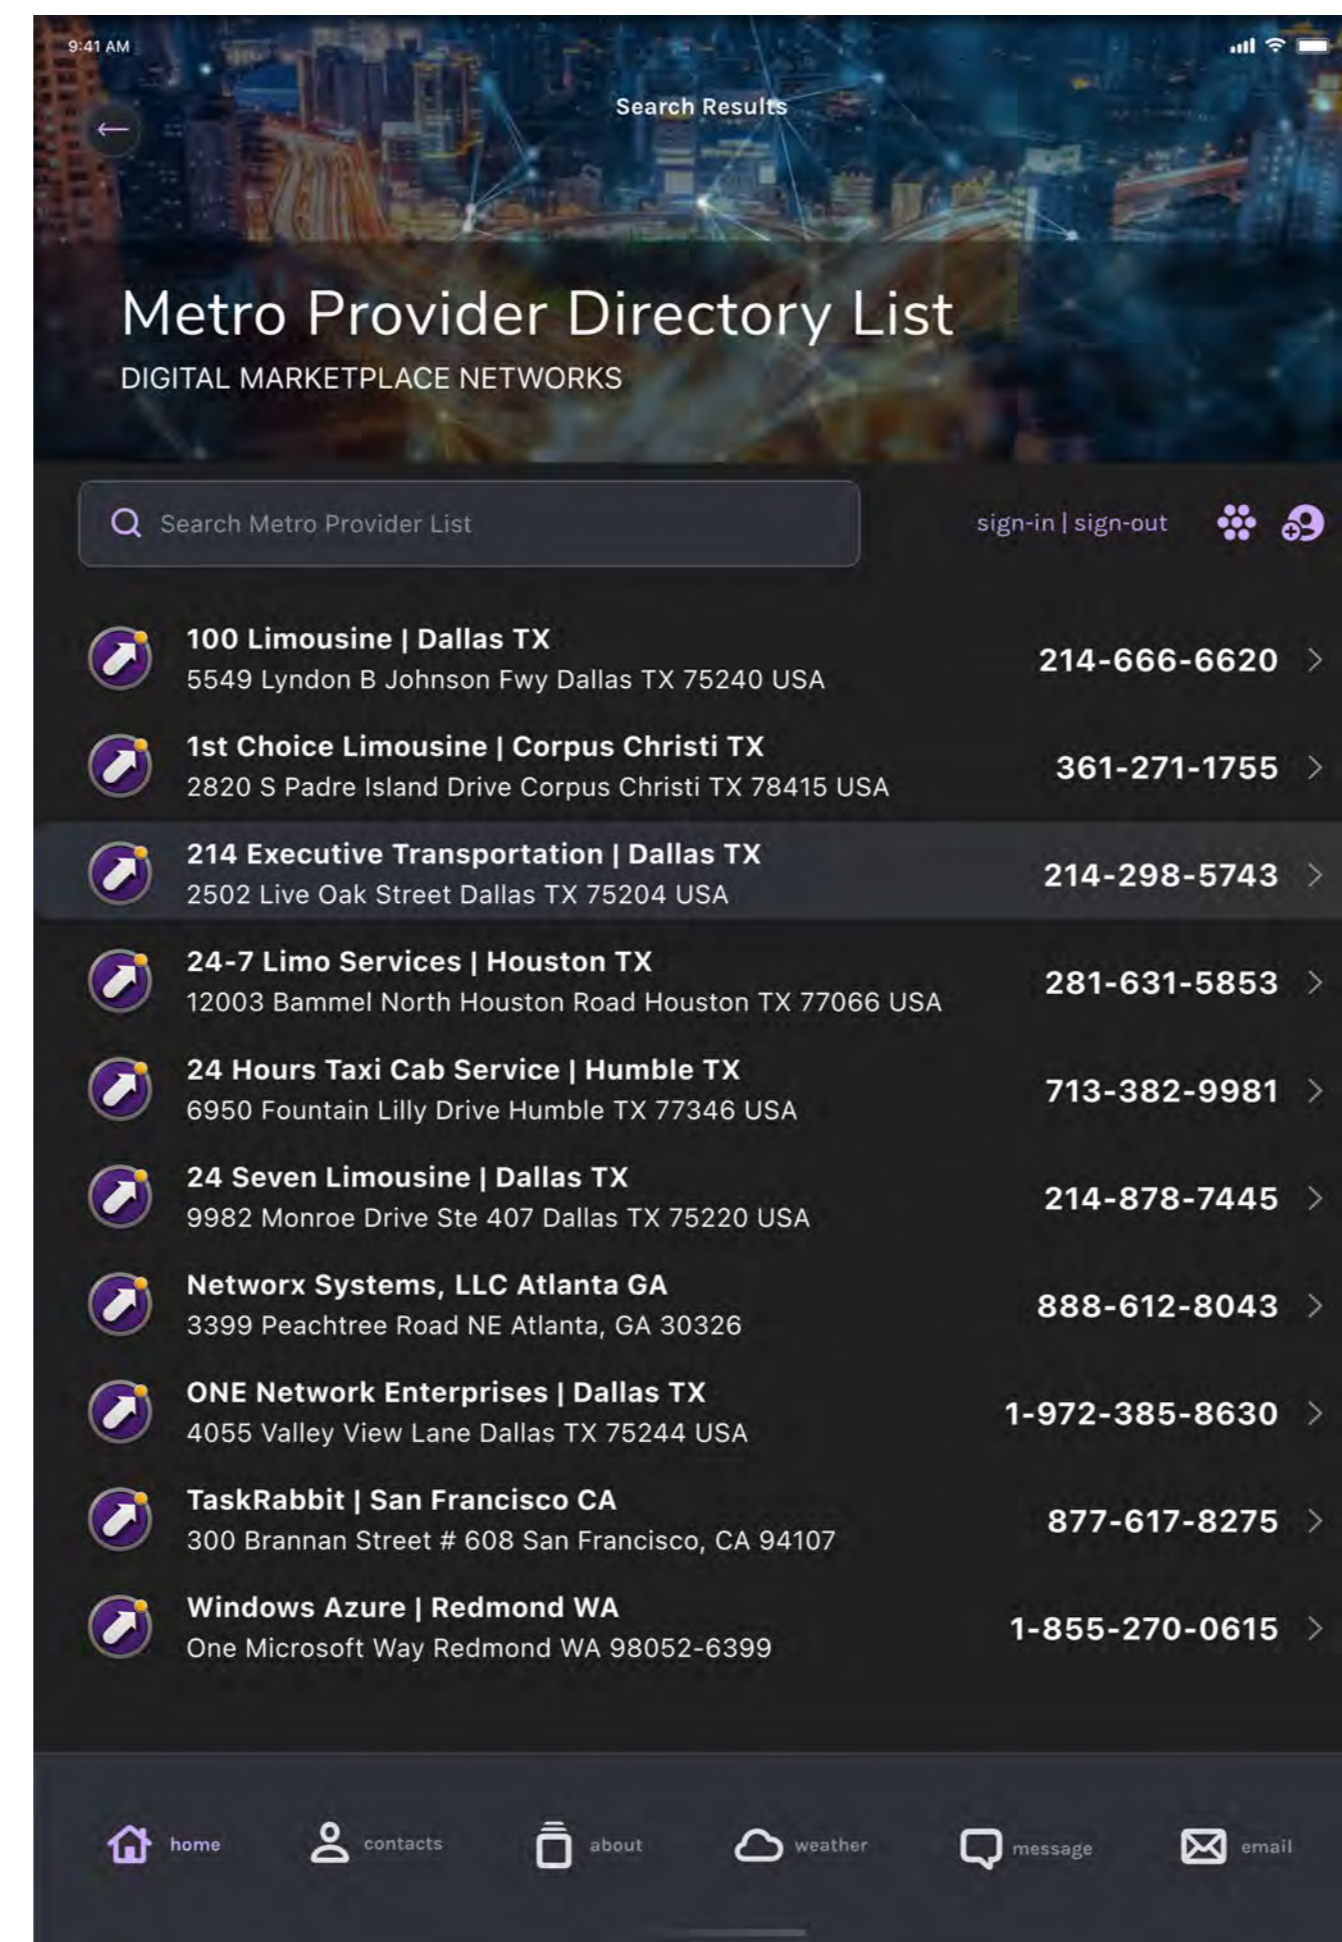

Metro provider directory listing with search and filter function

Carousel Sliding Menu

The sliding carousel menu improves the overall usability and provide a visually engaging way for the users to interact with the directory content in our mobile application.

Metro provider directory grid listing with search and filter function

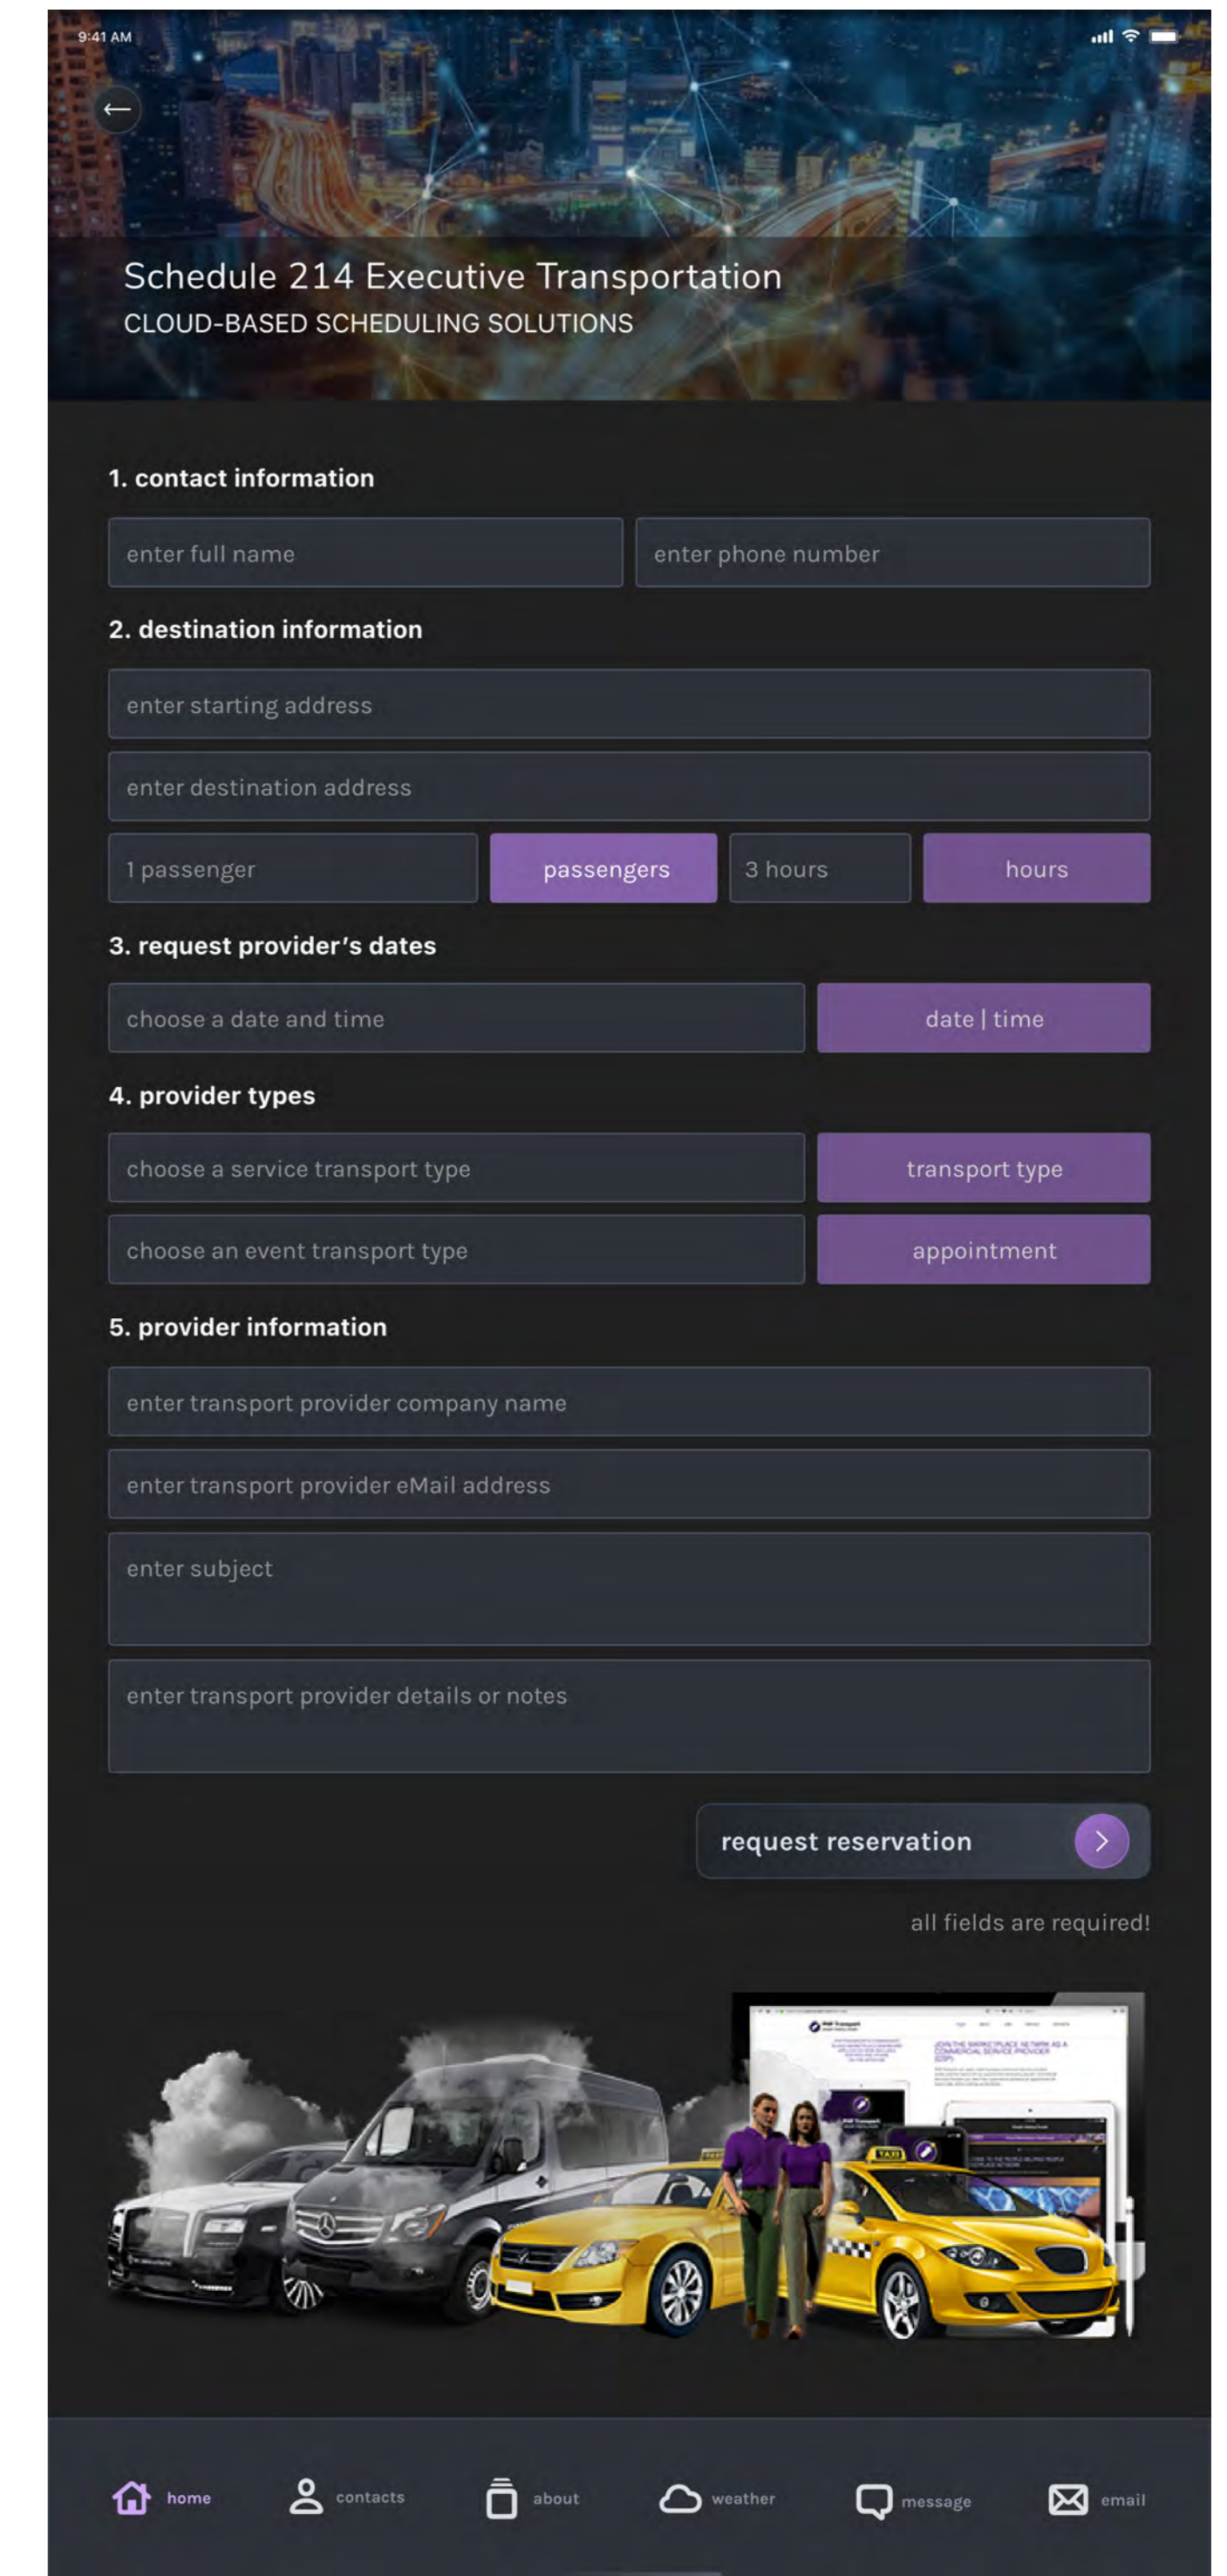

Collaborative Communities

The DMN Platform enables marketplace participants to rapidly customize, and collaborate in a multi-business networking ecosystem. Unlike most "network" applications that consist of a mesh-up of single-point-applications (SPAs), the DMN Platform is designed to enable multi-business multi-collaborative networking communities.

Dashboard and Reports

The dashboard provides an overview of upcoming appointments, client information, and provider availability, while the reporting functionality enables users to generate insights through various metrics.

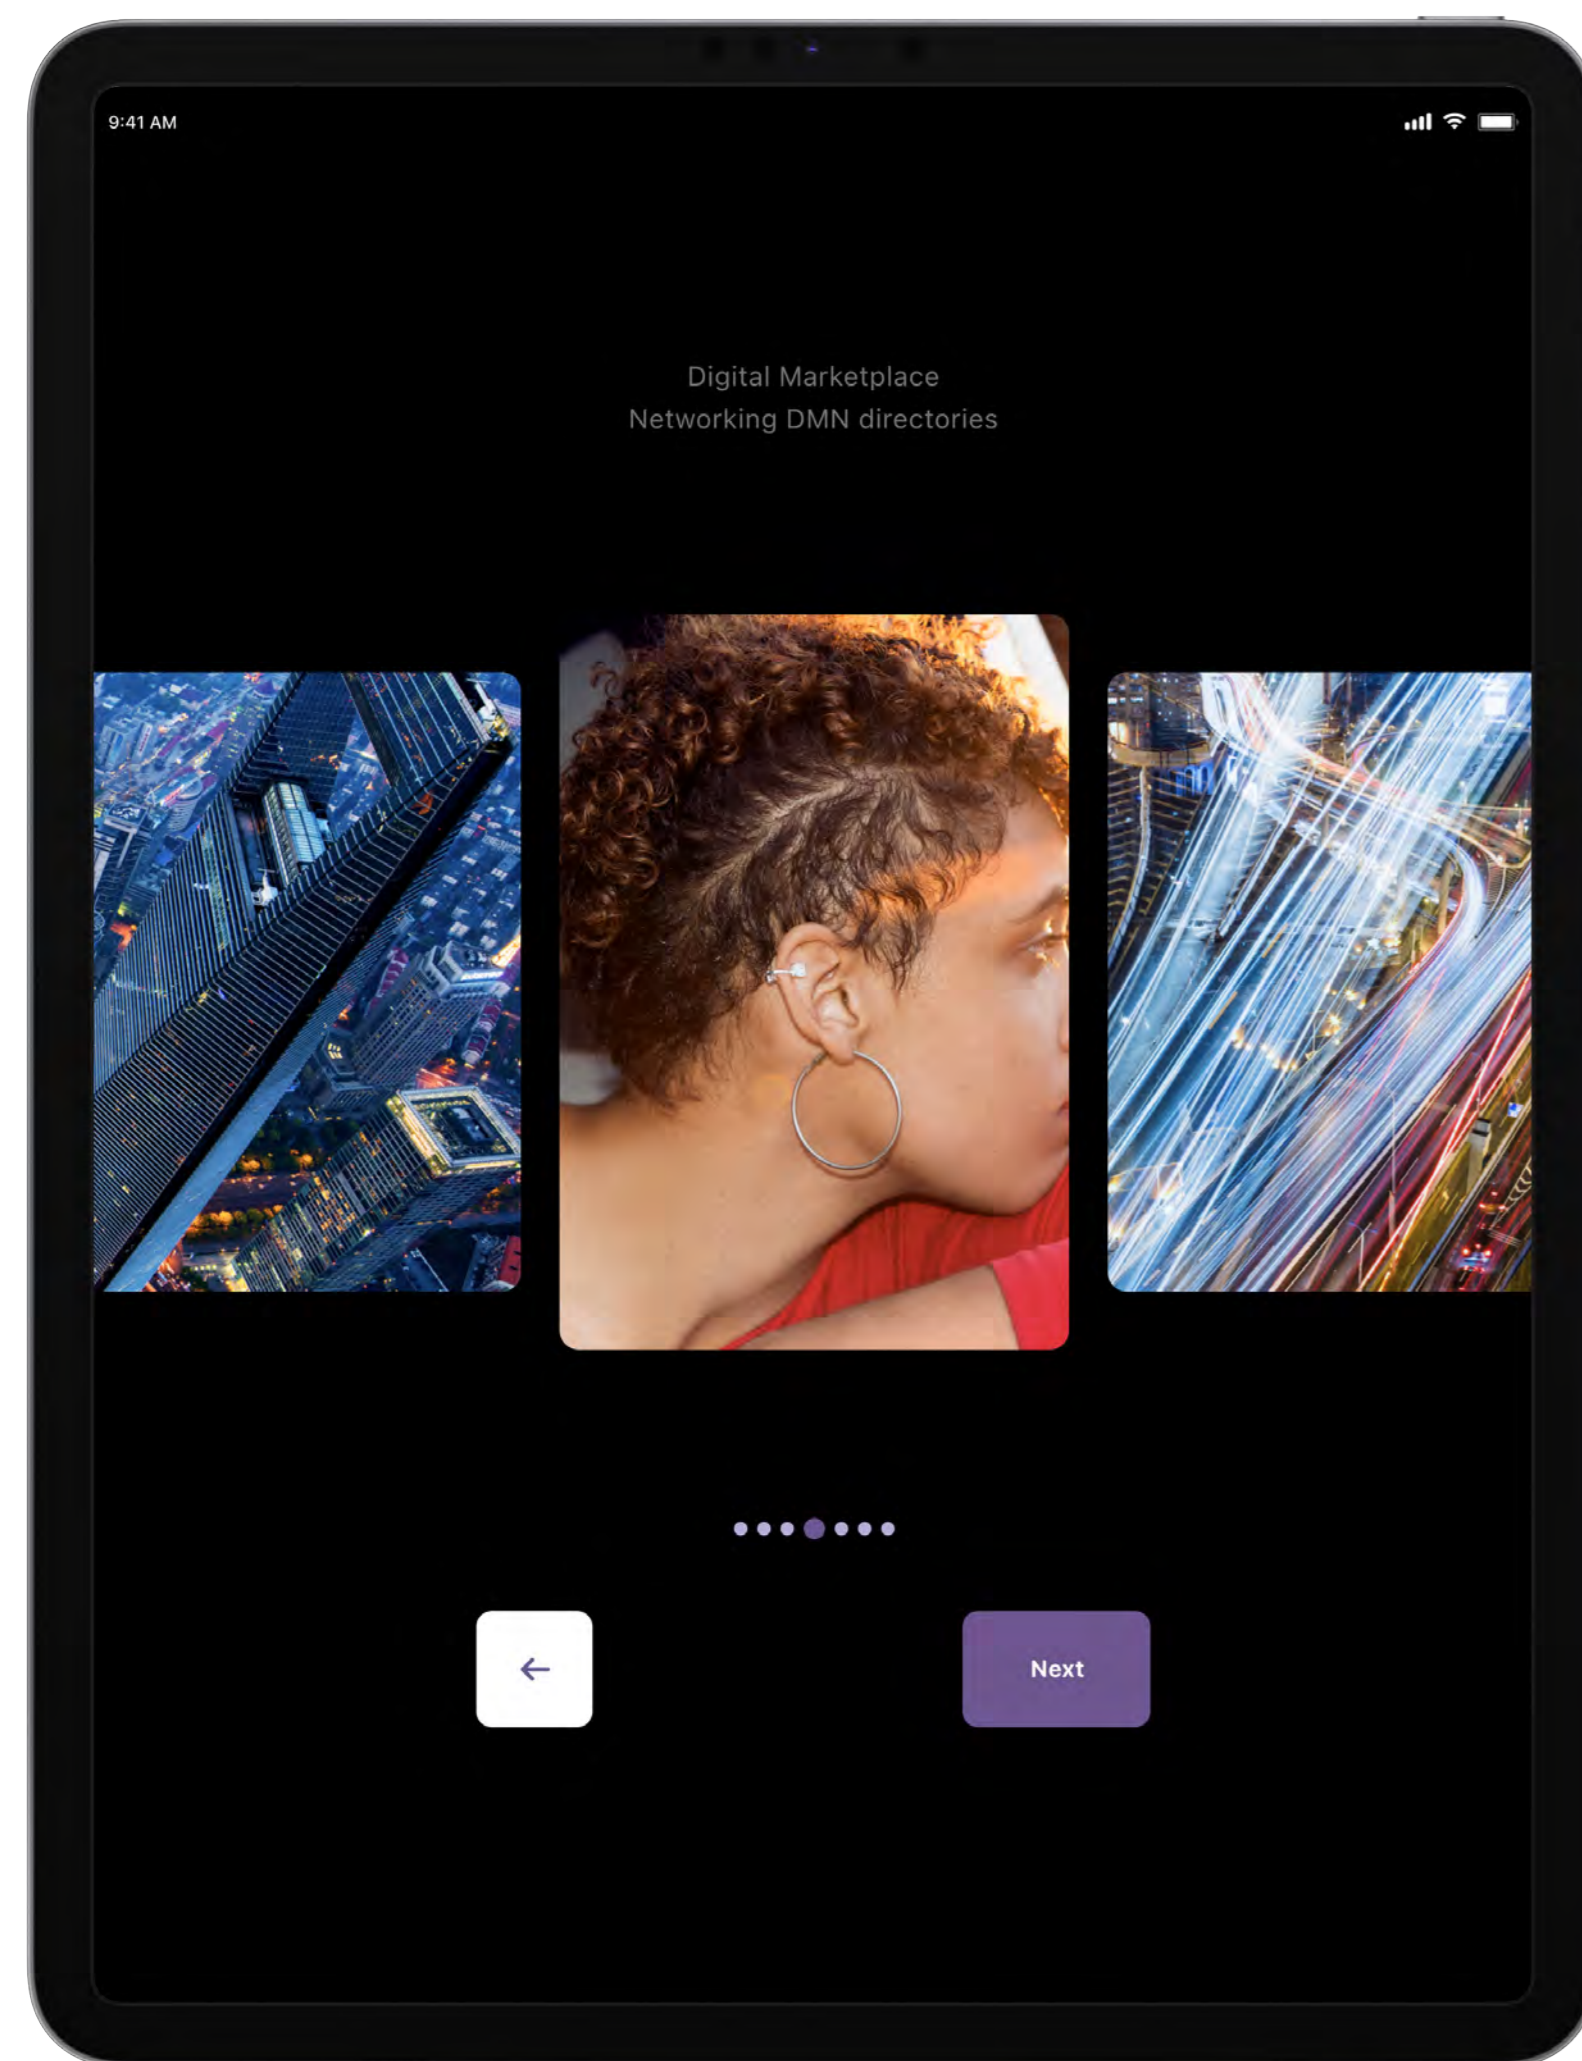

Intelligent automated request

The DMN Platform is powered by Firebase proprietary AI and machine learning technology. It is the intelligence behind the DMN Platform and the Digital Marketplace Network (DMN). The technology is a constant-monitoring-learning DMN assistant, continuously identifying, monitoring, analyzing and resolving problems so you can focus on the important issues.

Marketplace provider directory listings

A cloud-hosted NoSQL database that lets you store and sync data between marketplace participants in realtime.

Provider portal page

The impact of networks on business has been rapid and profound. The world's largest and most successful companies are network-based.

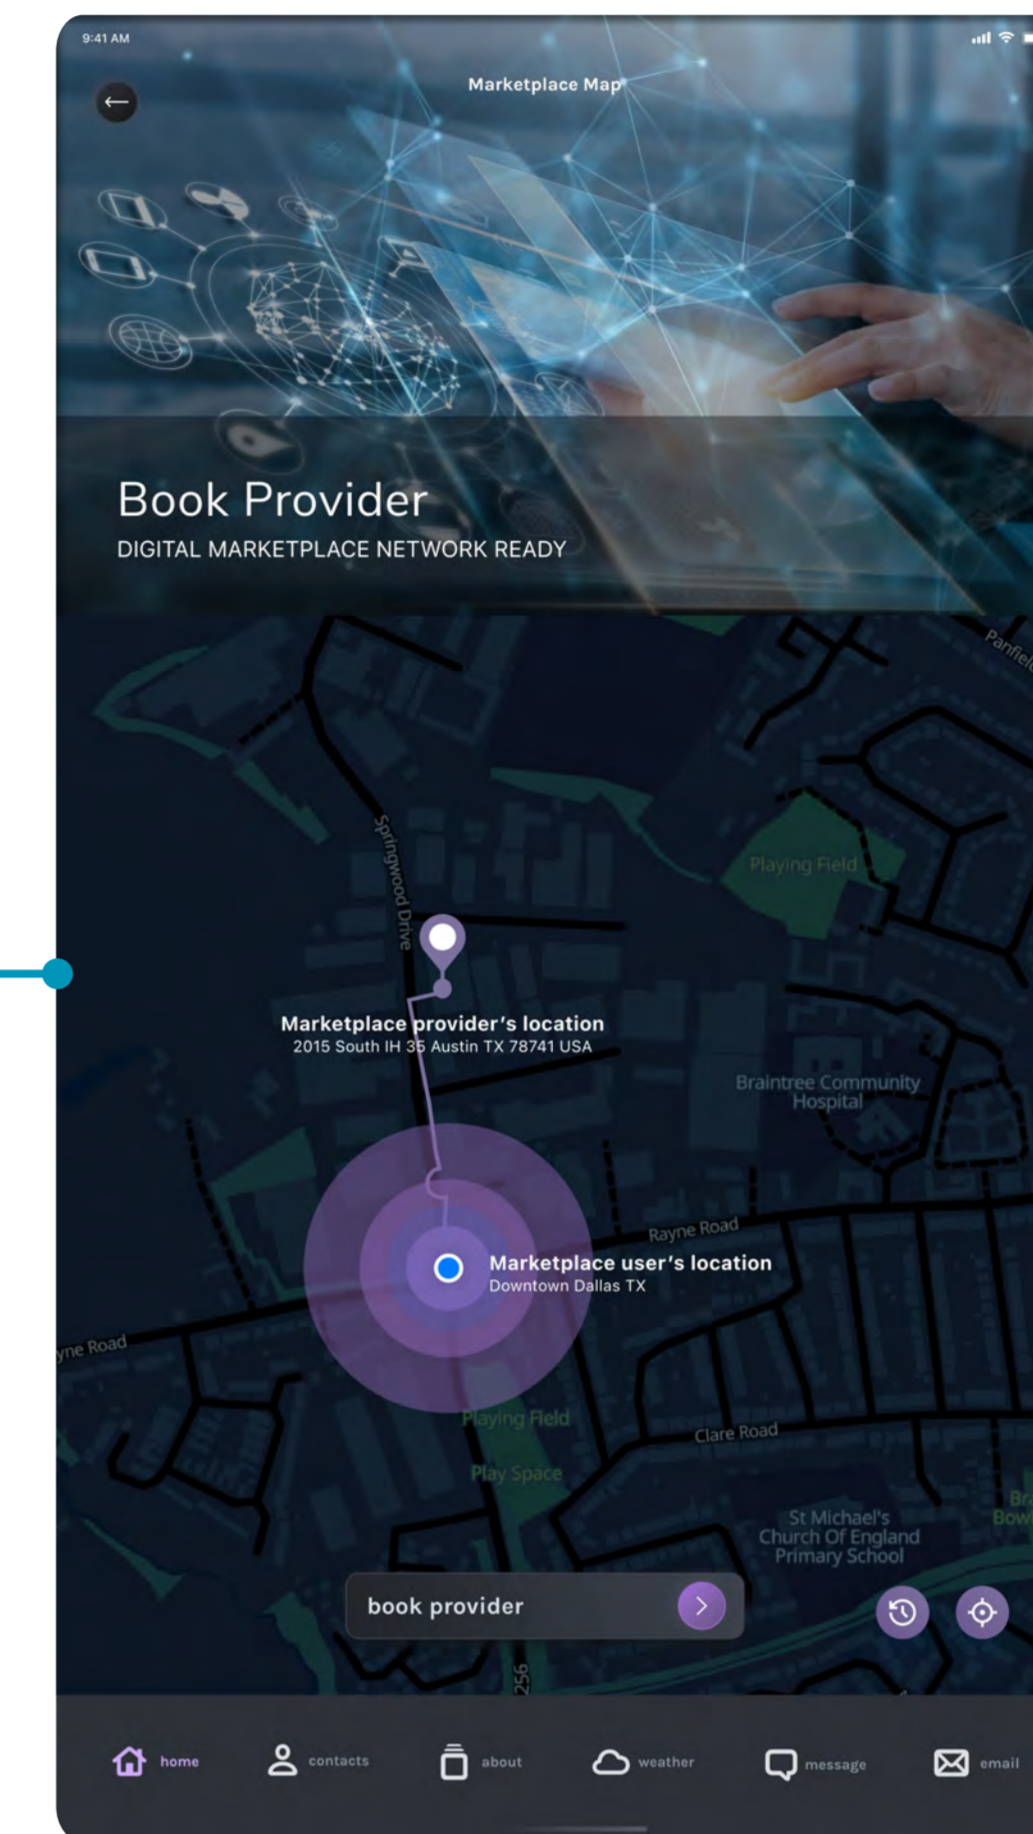

Marketplace participants map page

Onboard once do business with anyone. It is no longer feasible to implement and manage point-to-point integrations between marketplace participants. Similar to joining a social network, companies should only need to connect once to the platform, and then communicate with any business on the marketplace network.

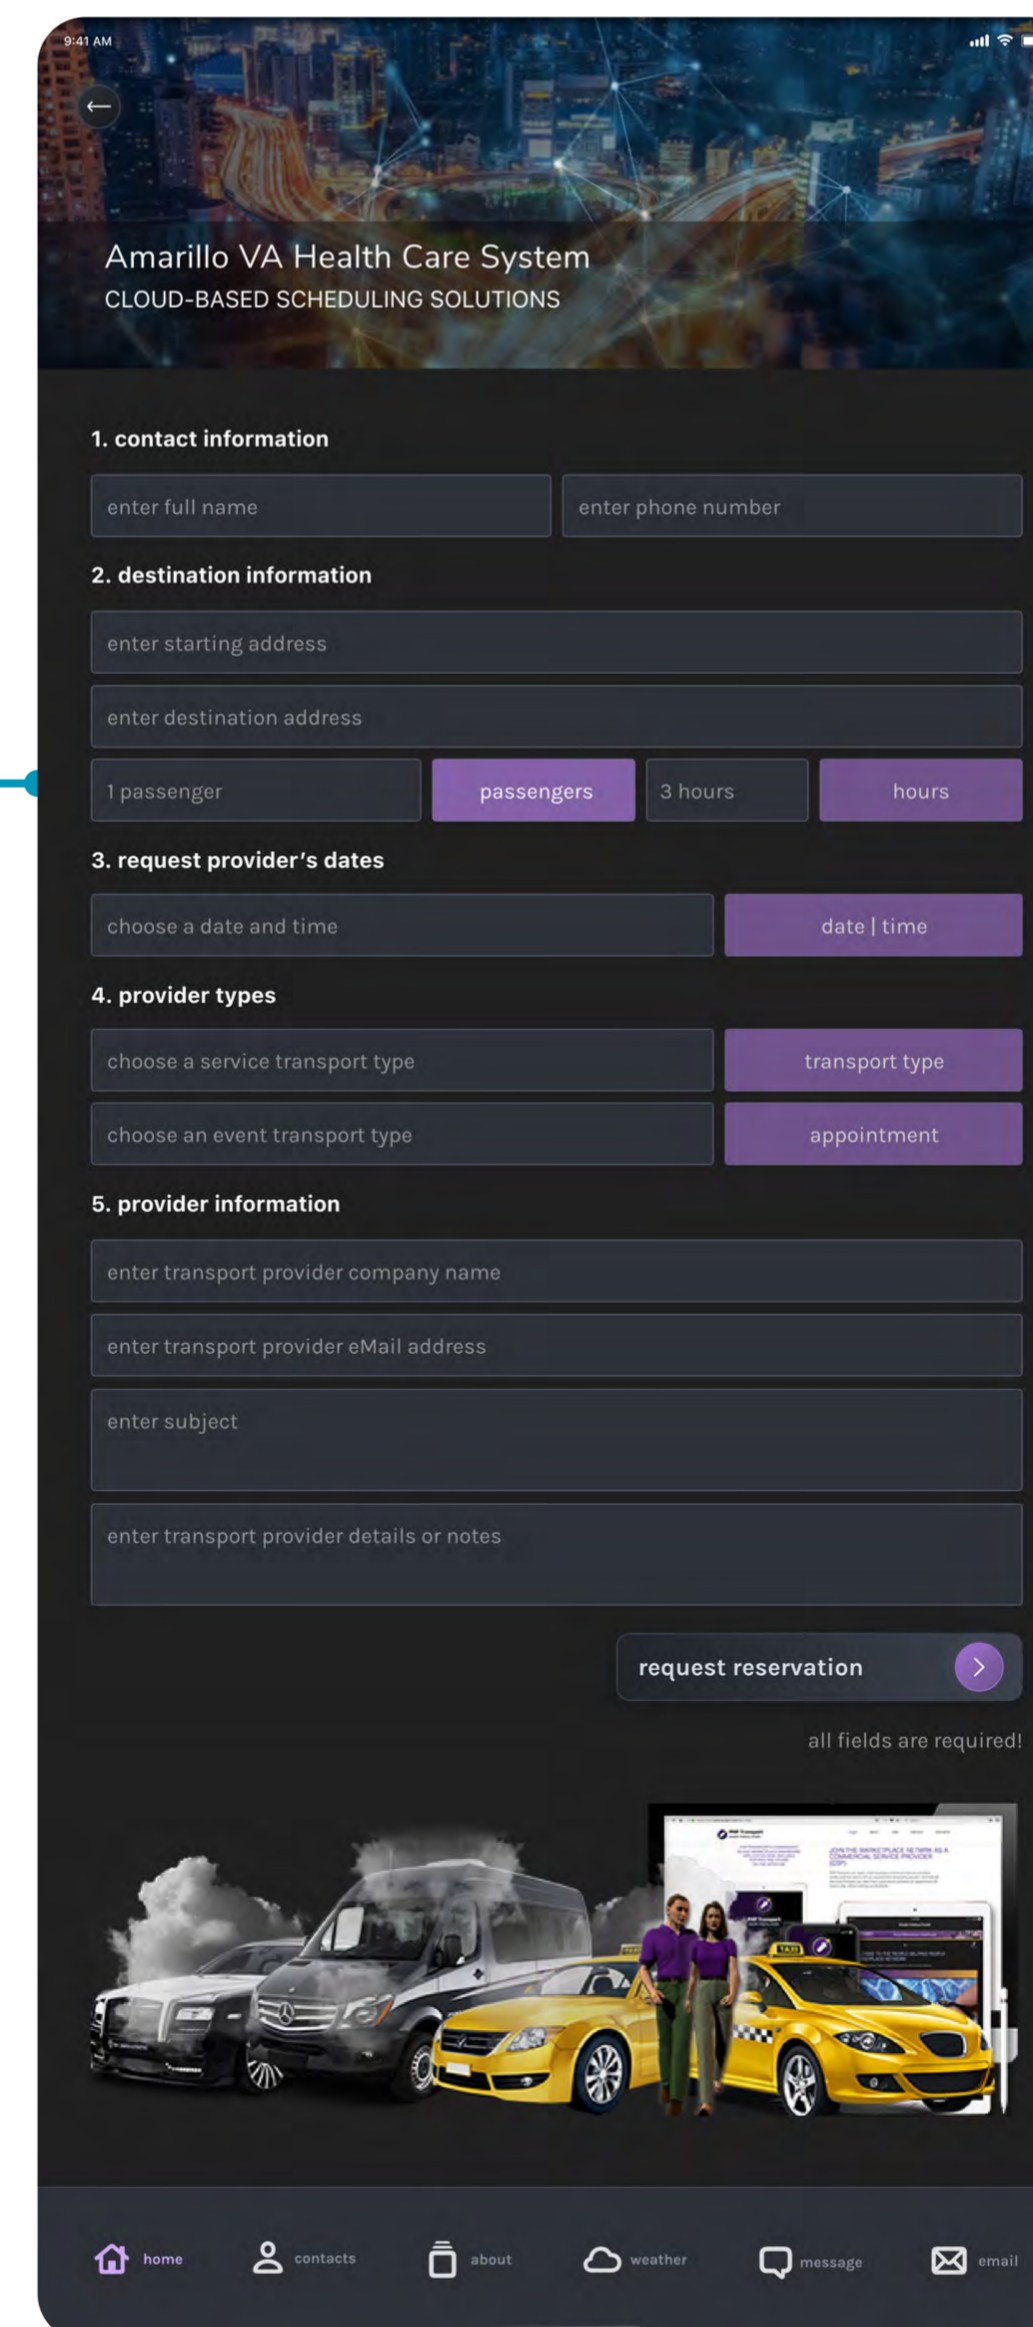

Provider listing detail view

DMN Platform starts out smart and gets smarter. DMN has accumulated insight from across the integrated network, across marketplace participants and a variety of workflow modules.

Provider portal map page

Provider request form

A cloud-hosted NoSQL database that lets you store and sync data between marketplace participants in realtime. Enabling participants to store, sync and query app data at global scale.
