

SimpliGO Disaster Preparedness Planner (DPP) powered by Google’s Firebase Brings Artificial Intelligence and Machine Learning to our collaborative community

DMN is powered by Firebase proprietary AI and machine learning technology. It is the intelligence behind the DMN Platform and the Digital Marketplace Network (DMN). Firebase proprietary AI is your constant-monitoring-learning DMN assistant, continuously identifying, monitoring, analyzing and resolving problems so you can focus on the important issues. DMN gathers information from across your entire marketplace ecosystem and analyzes and optimizes workflow processes and resolves issues. The capabilities include autonomous learning, recognizing text, labeling images, tracing data and much more. DMN works in the background and with users to constantly find and identify issues. DMN knows, learns and acts to keep your marketplace and your collaborative network running optimally.

Automated modular workflows

Use the powerful capabilities of Apple platforms to build apps that integrate seamlessly with enterprise systems to transform how your business works. Configure modules based on the needs of the marketplace participant using the DMN Platform. You can modify and build new custom intelligent apps to perform actions based on network analytics.

Apple Xcode platforms puts the cutting-edge technology of iOS, iPadOS, macOS, tvOS, and watchOS at your fingertips

Xcode Cloud is a continuous integration and delivery service built into Xcode and designed expressly for Apple developers. It accelerates the development and delivery of high-quality apps by bringing together cloud-based tools that help you build apps, run automated tests in parallel, deliver apps to testers, and view and manage user feedback. Configure workflows to suit your development process or use the built-in workflow to get started and customize it as your process evolves. You can build every committed code change and your whole team is instantly alerted if a change introduces any issues — potentially saving days of wasted time before the bug would be found by end users.

Android XR platforms puts the cutting-edge technology of Ladybug studio, Adaptable Apps, Wear OS, Android TV, and Android for Cars at your fingertips

The Android XR platform unlocks a world of cutting-edge technology by integrating Ladybug Studio, Adaptable Apps, WearOS, Android TV, and Android for Cars into a unified experience. These technologies enhance the capabilities of the SimpliGO Disaster Preparedness Planner (DPP) Digital Marketplace Network (DMN) app, delivering powerful tools for disaster readiness and recovery across a diverse range of Android devices. By leveraging the Android XR ecosystem, SimpliGO ensures that users can access critical features and resources, no matter where they are or what device they are using.
